Professional Summary

Aspiring UX Designer with a Computer Science background and strong front-end skills. Experienced in Figma, usability testing, and wireframing, with a focus on designing intuitive, user-first interfaces. Currently completing the Google UX Design Certificate and driven to solve real-world problems through accessible, thoughtful design.

Education

CALVIN UNIVERSITY

Grand Rapids, MI

Bachelor of Science in Computer Science

Expected August 2025

Relevant Coursework: Software Engineering, Operating Systems, Networking, Web Development, Computer Architecture

Experience

Freelance UX Engineer (Volunteer)

May 2025 Present

Edmon Preschool

Remote (Ghana)

- Collaborated with school leadership and the social media team to gather requirements and define goals for Edmon’s first school website.
- Conducted stakeholder interviews and developed user personas to inform the site structure and key content areas.
- Designing a responsive website that showcases the school’s story, mission, events, and admissions in a clear and engaging way.
- Prototyping wireframes and visual mockups using Figma, ensuring accessibility and brand consistency.
- Building user-facing components with React and Vite to deliver a seamless, mobile-friendly experience.
- Iterating on design and functionality based on user and team feedback to improve usability and engagement.

Projects

ErgoQuest – React Native, Figma

- Designed a mobile app to replace ErgoQuest’s physical remote, enabling Bluetooth-based controls, customizable presets, and automated transitions to enhance accessibility.
- Developed interactive prototypes in Figma and conducted user testing to validate and refine user flows.

SpendWise – Figma, React, Firebase

- Designed and developed a budgeting web app that allows users to track spending by category and set monthly goals.
- Built interactive UI components in React and implemented real-time data storage and authentication using Firebase.
